

AGENDA

PLANNING AND ZONING COMMISSION SPECIAL MEETING

July 20, 2020

BARTONVILLE TOWN HALL

6:30 P.M.

In accordance with order of the Office of the Governor issued March 31, 2020, and in accordance with subsequent orders issued by Office of the Governor issued after that date, the Bartonville Planning and Zoning Commission will conduct a special meeting at Town Hall, 1941 E. Jeter Road, Bartonville, Texas 76226 AND by video conference in order to advance the public health goal of limiting face-to-face meetings (also called “social distancing”) to slow the spread of the Coronavirus (COVID-19).

The link to the video conference is www.townofbartonville.com/videomeeting *Please note there is an approximate 30 second delay.*

The public will be permitted to offer public comment via teleconference/video as provided by the agenda and as permitted by the presiding officer during the meeting by joining the meeting at www.zoom.com or by calling the toll-free dial-in number at 877 853 5257. The **meeting ID number is 847 0386 4384** and the **passcode is 364750**. To request to speak at the appropriate time, raise your hand via video or enter *9 on your phone. The identity of each speaker must be clearly stated prior to speaking.

A. CALL TO ORDER

B. CLOSED SESSION

The Planning & Zoning Commission to convene into a closed meeting pursuant to Texas Government Code Chapter 551, section 551.071 to discuss matters relating to consultation with Town Attorney as follows:

- a. Consultation with Town Attorney regarding legal issues concerning fire code and septic system requirements for Site Plan for First Church Nazarene/Lantana Community Church/Harvest Christian Academy, and related matters.

C. RECONVENE OPEN MEETING

The Planning & Zoning Commission to reconvene into an open meeting and consider action, if any, on items discussed in closed session.

D. PLEDGE OF ALLEGIANCE TO THE AMERICAN FLAG

E. PUBLIC PARTICIPATION

F. REGULAR ITEM

1. Consider recommendation to the Town Council regarding a Site Plan for First Church Nazarene/Lantana Community Church/Harvest Christian Academy being all of a tract of land being described as Kincade Lot 2R, Block A, Town of Bartonville, Denton County, Texas. The property is generally described as a 10.09-acre tract of land located on the north side of East Jeter Road, more commonly known as 2200 E. Jeter Road, Bartonville, Texas. ***(On July 1, 2020, the Planning and Zoning Commission (P&Z), after closing the public hearing, postponed consideration and action on their recommendation until a special meeting on July 13, 2020; On July 13, 2020, the P&Z again postponed their recommendation until another special meeting on July 20, 2020.)***

G. ADJOURNMENT

I do hereby certify that the Notice of Meeting was posted on the bulletin board at Town Hall of the Town of Bartonville, Texas, a place convenient and readily accessible to the general public at all times and said Notice was posted on the following date and time: July 17, 2020 at 1:40 p.m. at least 72 hours prior to the time of said meeting.

Sylvia Ordeman, Town Administrator

The Planning and Zoning Commission reserves the right to adjourn into a closed meeting or executive session as authorized by Texas Government Code, Sections 551.001, et seq. (the Texas Open Meetings Act) on any item on its open meeting agenda in accordance with the Texas Open Meetings Act, including, without limitation Sections 551.071-551.088 of the Texas Open Meetings Act. Any final action, decision, or vote on a matter deliberated in a closed meeting will only be taken in an open meeting that is held in compliance with Texas Government Code, Chapter 551.

Planning and Zoning Special Meeting

Item #1

- DATE:** July 20, 2020
- FROM:** Sylvia Ordeman, Town Administrator
- ITEM:** Consider recommendations to the Town Council regarding a Site Plan for First Church Nazarene/Lantana Community Church/Harvest Christian Academy being all of a tract of land being described as Kincade Lot 2R, Block A, Town of Bartonville, Denton County, Texas. The property is generally described as a 10.09-acre tract of land located on the north side of East Jeter Road, more commonly known as 2200 E. Jeter Road, Bartonville, Texas. ***(On July 1, 2020, the Planning and Zoning Commission (P&Z), after closing the public hearing, postponed consideration and action on their recommendation until a special meeting on July 13, 2020; On July 13, 2020, the P&Z again postponed their recommendation until another special meeting on July 20, 2020.)***
-

Summary:

The Planning and Zoning Commission moved on July 13, 2020, to postpone their recommendation until a special meeting on July 20, 2020. The postponement was to allow the Planning & Zoning Commission time to review three documents submitted by the applicant prior to the July 13, 2020 Planning and Zoning Special Meeting:

- Letter from Roger J. Ivey on behalf of First Church Nazarene / Lantana Community Church / Harvest Christian Academy
- OSSF Report from Peak XV Engineering Group
- U.S. Department of Justice Civil Rights Division: Religious Land Use and Institutionalized Persons Act

The two main outstanding issues that need to be addressed include:

- The septic system; and
- Fire code/sprinkler system:

ATTACHMENTS:

- Letter from Roger J. Ivey
- OSSF Report from Peak XV Engineering Group
- U.S. Department of Justice Civil Rights Division: Religious Land Use and Institutionalized Persons Act
- Copy of Agenda Item from July 13, 2020, meeting

Re: Site Plan for First Church Nazarene / Lantana Community Church / Harvest Christian Academy

Dear Members of the Commission,

Thank you for your careful consideration of the First Church of the Nazarene's plans to host Harvest Christian Academy at its Bartonville Church. The Church, Harvest Christian Academy, and the incoming fall students and families are all excited about opening in the fall and the prospect of contributing to the local community for years to come.

As you may know, the Church's members have been involved in ministering to the citizens of Bartonville and the surrounding community for many years. Even in the midst of the recent Covid shutdowns, Church members have held food drives for needy local residents and performed a host of other ministry activities. These efforts greatly benefit the local community and help alleviate expense, social costs, and adverse impacts on the town of Bartonville. As part of its growing local ministry, the Church has partnered with Harvest Christian Academy to continue its mission of providing affordable quality religious education that serves and reflects the unique culture of Bartonville and the local community. The Church plans to serve up to 150 pre-school and K-12 students. To date, approximately 78 students have applied, and we expect to open the Academy this fall.

I am writing this letter on behalf of the Church, Harvest Christian Academy, and the interested families (of which I and my family are included). The purpose of this letter is to request your prompt resolution of the matters of concern raised below. [The Application Process](#)

As we discussed at the Commission's July 1st hearing, in January of this year the Church consulted with the Town to determine what, if any, approvals were required for its plans. At the Town's request, the Church initially filed a CUP application. Later, at the Town's recommendation, the Church converted the application to a Site Plan process. Though the Church and Academy have diligently responded to all of the Town's ongoing information requests, it appears the application is bogging down on two issues that threaten the Academy's fall opening: (a) whether or not the Church septic system is adequate to handle an occupancy of 150 students

and teachers on weekdays, and (b) whether or not the Church is required to retrofit with an automatic fire suppression sprinkler system. I address these matters below.

The Town Must Confirm Whether a Permit is Actually Required

I was asked to review and assist with this matter just before the July 1st Planning and Zoning Commission meeting. Based on my review, I believe the parties are operating with the mistaken understanding that a permit or approval is required for the Church's proposed use. I can find no legal authority to suggest this is the case. To the contrary, as applied to the facts in this situation, the Bartonville Town Code appears to specifically preclude requiring any new permit or approval.

To begin with, the Church operates under an existing Certificate of Occupancy from 2002 with a "Use Classification" of both "A-3" (Assembly Group 3) and "E" (Education Group).¹ This means that the Church has already been approved for both religious assembly and education purposes. In fact, the original Church Site Plan shows an auditorium capacity of 550 persons, in addition to the classroom and office space. This is far greater use than the 150 students the Church currently hopes to have in its facility.² There is also no construction, development, or structural modifications of any kind planned for the building. The Church merely plans some clean-up, painting, and other cosmetic enhancements for this use.³

The Bartonville Code of Ordinances does not support requiring a permit for this use. Section 102.6⁴ of the Building Code, "Existing Structures", specifically states that:

The legal occupancy of any structure existing on the date of adoption of this code shall be permitted to continue without change, except as is specifically covered in this code or in the International Fire Code, or as is deemed necessary by the building official for the general safety and welfare of the occupants and the public.

Section 107.2.5, "Previous Approvals" also states that:

This code shall not require changes in the construction documents, construction or designated occupancy of a structure for which a lawful permit has been heretofore issued or otherwise lawfully authorized, and the construction of which has been pursued in good faith within 180 days after the effective date of this code and has not been abandoned.

¹ This COO, along with other documents referenced in this letter (but excluding the Codes) are included or will be included in the application file.

² As discussed later in this letter, it is also important to note that the Town issued an additional Certificate of Occupancy for the Church Building to Excel Christian Academy in June of 2013, with virtually the same occupancy as currently planned, and with no requirement to install fire sprinklers. Installation of an Alarm System was required.

³ Section 105.2 provides that permits shall not be required for painting, papering, tiling, carpeting, cabinets, counter tops and similar finish work.

⁴ Bartonville has adopted the International Building Code of 2009. References herein to the "Building Code" are references to the International Building Code of 2009, as adopted and amended by Bartonville in Section 3.02.041 of the Town Code.

Additionally, Section 107.2.5 of the Building Code, "Site Plan", only requires submission of a site plan with respect to new construction, demolition, alterations and repair.

As mentioned, in 2002 the Church was approved for the proposed use, with a much higher occupancy, and no change in use or alterations are being proposed. I could find no provision of the Building Code or the Fire Code, and there is no unique aspect of the proposed use, that would require a change in the Church's previously approved legal occupancy. The Town building official also has made no determination that changes are necessary for the "general safety and welfare of the occupants and the public," and such an unusual determination would not be supportable.

In light of this, we respectfully request that the Town either a) confirm that a permit or other approval is not required for the proposed continuing use, or b) obtain a formal written legal opinion detailing the basis on which any proposed permit or approval would be required.

Even if a Permit or Approval is Required, the Septic System Does Not Require Changes

Mr. Leslie Freeman, the City sanitarian, has opined that the Church must add effluent sprinkler heads to its septic system, and that this addition would require a design by a qualified engineer, a permit, and review and approval by the Town.⁵ However, Mr. Freeman's opinion significantly contradicts the independent assessment the Church previously obtained from Registered Sanitarian Jay Pinkston, who initially found that that Church's septic system was more than adequate for the proposed use. A copy of this report, dated June 25, 2020, is included with this letter. Mr. Pinkston initially found that the system was designed to process up to 3,000 gallons of wastewater per day. Even assuming a maximum occupancy of 150 persons, and that each person was a student who discharged 12 gallons of water a day,⁶ only 1800 gallons per day would be discharged by the Academy, which is far less than the septic system's existing capacity.⁷ It is also important to note that the Church obtained Mr. Pinkston's report (at significant expense and time expenditure) because Mr. Freeman directed it to do so, and selected Mr. Pinkston from a list of sanitarians provided by the City.

I reference Mr. Pinkston's "initial" report, because it is our understanding that following the July 1st Commission meeting Mr. Freeman may have had discussions with Mr. Pinkston, who subsequently changed his mind and issued a revised report, which, even though the Church engaged him, was not provided to the Church, but only to the Town. A copy of this report, dated July 6, 2020, is attached. We have a number of concerns about this process, not the least of which is transparency. It is also concerning that Mr. Freeman initially rejected the results of the very independent assessment that he required the Church to obtain.

⁵ Please note that the sanitarian stated the calculations will be impacted based on whether hot lunches are prepared on site daily. However, as the applicants have submitted on numerous occasions, the Church's kitchen is not a commercial kitchen and no hot lunch preparation for the Academy will be done at the facility.

⁶ At the July 2nd hearing I understood Mr. Freeman to agree with the use of 12 gallons per student per day estimate.

⁷ At the hearing Mr. Freeman expressed concern that a large amount of metered water used by the church was entering the septic system. Church Pastor Calvary Callender responded that most of this water is used for irrigation of the five acres surrounding the church, and is not entering the septic system, which is not separately metered. The Church can provide historical water bills and other evidence to establish this fact.

In light of this, the Church has, at further expense, engaged licensed Professional Engineer Mr. Cecil A. Cheshier to render an opinion on the septic system's adequacy for the proposed use. We anticipate receiving and providing this report to the Commission at its meeting this evening.

In any event, it would be unfair and unnecessary to risk the Academy's opening over this issue. As such, we respectfully request that the Commission make any decision regarding the septic system conditional on whether or not a permit or approval is actually required. Assuming a permit is required, we request that the Commission accept Mr. Pinkston's initial assessment (and presumably Mr. Cheshier's assessment) and approve the septic system as-is without modifications for the proposed use. If the Commission still has concerns regarding the septic capacity, we request that the Town engage a professional engineer, at the Town's expense, and who is not known to Mr. Freeman, to provide an additional independent assessment. We also request that the Church be granted permission to open the Academy and be given a reasonable amount of time to perform any modifications the Town may require as it grows to an occupancy of 150 persons.

Even if a Permit or Approval is Required, Automatic Fire Sprinklers are Not Required

The second issue of concern regards the Fire Marshall's, Assistant Fire Chief Mike Lugo's, understanding that if the building's use includes education, and there is an occupancy of more than 100 persons, the Church will be required to install an automatic fire sprinkler system. The lives and safety of the children in the Academy's care (several of whom are mine) are the highest priority. However, the initial estimate the Church obtained for this system was \$160,000. This is simply an unobtainable amount of money for this small Church and fledgling ministry, and we respectfully disagree that retrofitting an automatic sprinkler system is either required or necessary.

We also request clarification of whether or not the Fire Marshall's proposed limit would apply to the Church's other religious activities and its current occupancy of at least 550 persons.

Here are some important background points regarding this issue:

- The original Site Plan for the building shows an occupancy of at least 550 persons in the auditorium alone, not counting the educational rooms and offices.
- The Church's 2002 Certificate of Occupancy has a "Use Classification" of both "A-3" (Assembly Group 3) and "E" (Education Group). This means that the Church has already been approved for both religious assembly and education purposes.
- The currently proposed Christian Academy is a ministry effort of Lantana Community Church. Both are religious 501(c)(3) non-profit charities.
- No structural changes will be made to the Church building regarding the Academy.
- The Church has supported two religious Academies at the site previously (Coram Deo Academy in 2002-2005 and Excel Christian Academy from 2013 to about 2016). Sprinklers were not required even as late as 2013. Asst. Chief Lugo reviewed the 2013 site plan for Excel Academy, which was nearly identical to the current proposed use.

- A Fire Code compliant alarm system was installed in 2013 as a result of the Excel Academy approval.
- The building has no basement. The kitchen is a non-commercial kitchen with a residential grade stove. The kitchen will not be used to prepare meals for students. Every classroom on the first floor has an exit door directly to the outside of the building. There are two exits on the second floor.
- There is no laboratory or other unique potential fire hazard in the building.
- Classroom size will be 20 persons or less, with constant trained adult supervision. Staff and students will be trained in fire evacuation procedures.
- The proposed use is not a public Charter School and is not supported by public funds.

Fire Code Requirements:

I can find no legal authority to suggest that the Church is required to install automatic fire sprinklers in an existing education facility, particularly for a previously approved use. To the contrary, as applied to the facts in this situation, the Bartonville Town Code appears to specifically preclude requiring fire sprinklers.

Bartonville has adopted the International Fire Code of 2012⁸. As the Fire Marshall notes in his July 6th memorandum, Section 102.3 of the International Fire Code of 2012 (the "IFC") states that "No change shall be made in the use or occupancy of any structure that would place the structure in a different division of the same group or occupancy or in a different group of occupancies, unless such structure is made to comply with the requirements of this code..." (emphasis added). The Fire Marshall then records that IFC Section 903.2.3 requires sprinkler systems for "Group E" (educational) occupancies.⁹ However, no change is being proposed in the previously approved use or occupancy, and Section 903.2.3 only applies to "new buildings and structures" – not existing structures. Section 903.6, titled "Where Required in Existing Buildings and Structures," specifically states that "(a)n automatic sprinkler system shall be provided in existing buildings and structures where required in Chapter 11" (emphasis added). In turn, Chapter 11, Section 1103.5 ("Sprinkler Systems") provides as follows:

⁸ Town of Bartonville Code of Ordinances, Sec. 3.02.161

⁹ 903.2.3, "Group E" states that:

An automatic sprinkler system shall be provided for Group E occupancies as follows:

1. Throughout all Group E fire areas greater than 12,000 square feet (1115 m2) in area.
2. Throughout every portion of educational buildings below the lowest level of exit discharge serving that portion of the building.

Note: Bartonville Code Sec. 3.02.161 amends IFC Section 603.2, such that all references in the IFC to 12,000 square feet shall mean 5,000 square feet.

1103.5 Sprinkler Systems

An automatic sprinkler system shall be provided in *existing buildings* in accordance with Sections 1103.5.1 and 1103.5.2.

1103.5.1 Pyroxylin Plastics

An automatic sprinkler system shall be provided throughout existing buildings where cellulose nitrate film or pyroxylin plastics are manufactured, stored or handled in quantities exceeding 100 pounds (45 kg). Vaults located within buildings for the storage of raw pyroxylin shall be protected with an approved automatic sprinkler system capable of discharging 1.66 gallons per minute per square foot (68 L/min/m²) over the area of the vault.

1103.5.2 Group I-2

An automatic sprinkler system shall be provided throughout existing Group I-2 fire areas. The sprinkler system shall be provided throughout the floor where the Group I-2 occupancy is located, and in all floors between the Group I-2 occupancy and the level of exit discharge.

Thus, Section 1103.5 is the only *requirement of this code* for sprinkler systems in existing buildings, and this requirement only applies to (a) buildings used for the manufacture, storage, or handling of cellulose nitrate film or pyroxylin plastics, or (b) for Group I-2 structures, which are structures used for 24 hour medical care for persons not capable of self-preservation.¹⁰ In light of this, the IFC contains no requirement for the installation of sprinkler systems in an existing structure used for an educational ("Group E") occupancy even if there was a change of use.¹¹

In cases where the International Fire Code applies new requirements to existing structures, it clearly states that they apply to existing structures.¹² This is clear from Section 1103.5, "Sprinkler Systems" (quoted above) and is found in other Chapter 11 provisions regarding fire alarms and other issues. Language that would require sprinkler systems for educational activities in an existing structure simply does not exist in the 2012 IFC.

As a practical matter, given that the Church is currently approved for occupancy of at least 550 persons and for both A-3 and E Use Classifications, it makes sense that sprinklers would not be required merely for the Church to increase its religious education activities within its existing approvals where no new development is performed. It is difficult to conceive that having 150 persons in the building during the week (under constant teacher supervision) would create more

¹⁰ IFC Section 202. General Definitions.

Institutional Group I-2. This occupancy shall include buildings and structures used for medical care on a 24-hour basis for more than five persons who are not capable of self-preservation..."

¹¹ IFC Section 903.2.1.3. Group A-3 requires sprinklers for new facilities with an occupant load of "300 or more."

¹² In the 2009 edition of the International Fire Code (IFC), regulations that apply retroactively to existing buildings were consolidated into a new Chapter 46 (in the 2012 edition, Chapter 46 becomes Chapter 11).

risk of fire than having 550 or more persons of all ages in the building with no particular adult supervision requirement during religious activities (which may occur at any time). The risk of harm during egress for students, during daylight hours, with robust teacher supervision, and where the children and adults are trained on emergency exit procedures, is far less than the risk during a Church event that may include elderly and disabled persons with limited mobility, where staff are not required to have any particular training or supervision requirements, and where services may take place for longer hours.

Finally, even if fire sprinklers were otherwise required in existing buildings, they would not be required in the Church's building. Regarding "Educational Group E," IFC Section 305.1 provides that "Religious *educational rooms* and religious auditoriums, which are accessory to places of religious worship in accordance with Section 303.1 and have occupant loads of less than 100, shall be classified as A-3 occupancies." Each of the Church's educational rooms clearly has an occupant load of less than 100.

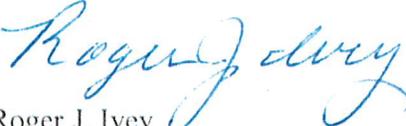

Religious Accommodation Concerns

Please also be aware that federal and Texas Constitutional and statutory law significantly value and protect the ability of citizens to exercise their religious freedoms. While we would in no way suggest that the Commission or the Town have any motive other than the health and safety of students, it is important to balance the burden that any permitting requirements would impose on the Church with the perceived need for such burdens. This is especially true in situations where, as here, the Church could be altogether precluded from the proposed use by what arguably is an undue burden of the sprinkler requirement. I have included a December 15, 2016 letter from the United States Justice Department regarding the Religious Land Use and Institutionalized Persons Act with further commentary on this topic for your consideration.

Conclusion

Thank you again for your thoughtful consideration of these matters. We look forward to the Town's response, and to finalizing this application in a manner that leads to a healthy and productive learning environment for our children and families and that alleviates any significant concerns the Town may have. If I may be of any assistance please feel free to call me at any time.

Sincerely,

Roger J. Ivey

Encl.

O.S.S.F. REPORT

Report Prepared By: Cecil A. Cheshier, P.E.
Subject Property: 2200 E. Jeter Road
Bartonville, TX 76226
Client: First Church of the Nazarene
Lantana Community Church
Date: 07-13-2020

Property Location & Description

The property is located at 2200 E. Jeter Road in the Town of Bartonville, Denton County, TX and consists of 10.009 acres with an approximate 19,004 square foot Church building. The property is in Abstract No. 0152 and is Lot 2R of KINCADE SUBDIVISION as recorded in Volume W, Page 76 of the Plat Records of Denton County, TX and is generally located at the southwest corner of E. Jeter Road and Wolf Run Road (approx. 0.05 miles south of FM 407/Justin Road).

Summary of Findings

The findings of my research indicate that the existing on-site sewage facility (O.S.S.F.) appears to have received a permit (No. 33) to construct the facility on 07-06-1998 and subsequently was inspected and received approval (Permit # B-6-98) by the Town of Bartonville on 08-03-1998. Available records indicate that the existing O.S.S.F. consists of two (2) 1,500 gallon per day (3,000 gallon per day combined) aerobic treatment units (ATU) with additional pre-treatment being provided by three (3) 500 gallon (1,500 gallons total) concrete septic tanks. The effluent disposal method is surface application with disinfection being provided by a stack-feed chlorine (calcium hypochlorite) tablet dispenser. The surface application is provided via a total of six (6) low-angle, pop-up rotary spray heads operating in a 360° rotation with an approximate radius of 36 feet with no overlapping. An indexing valve is utilized in order separate the spray heads into multiple independent zones of operation. The existing spray head configuration results in a total discharge surface area as follows:

$$\text{Total Area} = \pi \times \text{radius}^2 \times \text{number of spray heads}$$

$$\text{Total Area} = \pi \times (36 \text{ ft})^2 \times 6$$

$$\text{Total Area} = 4,071.50 \text{ ft}^2 \times 6$$

$$\text{Total Area} = 24,429 \text{ ft}^2$$

Per 30 TAC §285.90(1) the maximum application rate for surface application of treated effluent in Denton County, Texas is 0.064 gallons per square foot per day. Thus, the maximum disposal allowed in gallons per day is as follows:

$$\begin{aligned} \text{Max. Disposal (gal/day)} &= \text{Max. Application Rate gal/ft}^2/\text{day} \times \text{Total Area (ft}^2\text{)} \\ \text{Max. Disposal (gal/day)} &= 0.064 \text{ gal/ft}^2/\text{day} \times 24,429 \text{ ft}^2 \\ \text{Max. Disposal} &= 1,563.5 \text{ gal/day} \end{aligned}$$

The owner has indicated that this facility utilizes *water saving devices* and as such per 30 TAC §285.91(3) the anticipated wastewater usage rates for this facility are as follows:

Office buildings (no food or showers per occupant) = 4 gallons per day per occupant

Schools (without food service) = 12 gallons per day per occupant

Note: Table III. Wastewater Usage Rate does not include "Churches" as a Type of Facility therefore Office buildings (no food or showers per occupant) shall be utilized for the purposes of this calculation.

Based on the above determined hydraulic loading rates this O.S.S.F. is capable of supporting the following determined maximum daily occupancies:

$$\begin{aligned} \text{Max. Church Only Daily Occupants} &= 1,563.5 \text{ gal/day} \div 4 \text{ gal/occupant/day} \\ \text{Max. Church Only Daily Occupants} &= 390 \text{ occupants} \end{aligned}$$

$$\begin{aligned} \text{Max. School Occupants} &= 1,563.5 \text{ gal/day} \div 12 \text{ gal/occupant/day} \\ \text{Max. School Only Daily Occupants} &= 130 \text{ occupants} \end{aligned}$$

However, the owner has indicated that this facility is anticipated to be typically occupied as follows:

<u>Church</u>	<u>School</u>
Sunday = 156 occupants	Sunday = 0 occupants
Monday = 0 occupants	Monday = 100-130 occupants
Tuesday = 5 occupants	Tuesday = 100-130 occupants
Wednesday = 50 occupants	Wednesday = 100-130 occupants
Thursday = 5 occupants	Thursday = 100-130 occupants
Friday = 5 occupants	Friday = 100-130 occupants
Saturday = 0 occupants	Saturday = 0 occupants

Based on this information Wednesday is anticipated to be the day with the maximum total number of occupants with a potential wastewater usage as follows:

$$\begin{aligned} \text{Church wastewater useage (gal/day)} &= 50 \text{ occupants} \times 4 \text{ gal/occupant/day} \\ \text{Church wastewater useage} &= 200 \text{ gal/day} \end{aligned}$$

$$\begin{aligned} \text{School wastewater useage (gal/day)} &= 100 \text{ to } 130 \text{ occupants} \times 12 \text{ gal/occupant/day} \\ \text{School wastewater useage} &= 1,200 \text{ gal/day to } 1,560 \text{ gal/day} \end{aligned}$$

Based on the occupancy information supplied and the previous calculations of the existing disposal area (as presently configured), the maximum number of school occupants is calculated as follows:

$$\begin{aligned} \text{Max. Disposal} &= 1,563.5 \text{ gal/day} \\ \text{Church wastewater useage} &= 200 \text{ gal/day} \end{aligned}$$

$$\begin{aligned} \text{Max. wastewater useage available for School use} &= 1,563.5 \text{ gal/day} - 200 \text{ gal/day} \\ \text{Max. wastewater useage available for School use} &= 1,363.5 \text{ gal/day} \end{aligned}$$

$$\begin{aligned} \text{Max. Available School Occupancy} &= 1,363.5 \text{ gal/day} \div 12 \text{ gal/occupant/day} \\ \text{Max. Available School Occupancy} &= 113 \text{ occupants} \end{aligned}$$

Therefore this O.S.S.F. disposal area (as presently configured) is capable of supporting the following maximum total daily occupancies:

$$\begin{aligned} \text{Church wastewater useage (gal/day)} &= 50 \text{ occupants} \times 4 \text{ gal/occupant/day} \\ \text{Church wastewater useage} &= 200 \text{ gal/day} \end{aligned}$$

$$\begin{aligned} \text{School wastewater useage (gal/day)} &= 113 \text{ occupants} \times 12 \text{ gal/occupant/day} \\ \text{School wastewater useage} &= 1,356 \text{ gal/day} \end{aligned}$$

$$\begin{aligned} \text{Total wastewater useage} &= 200 \text{ gal/day} + 1,356 \text{ gal/day} \\ \text{Total wastewater useage} &= 1,556 \text{ gal/day} \end{aligned}$$

$$\text{Total wastewater useage} = 1,556 \text{ gal/day} \leq \text{Max. Disposal} = 1,563.5 \text{ gal/day}$$

Therefore with 50 church occupants and 113 school occupants this O.S.S.F. as presently configured meets the current T.C.E.Q. sizing requirements for On-Site Sewage Facilities under Title 30 TAC Chapter 285.

Recommendations

The existing and legally permitted O.S.S.F. in its current configuration is capable of supporting the proposed additional school use with the occupancy limitations as stipulated in the above calculations. Should the necessity to allow more school occupants arise in the future then the 10.009 acre site has sufficient useable area available in order to enlarge the effluent disposal area as required to accommodate more students. In the future an additional 43 students could be accommodated by adding two (2) more similarly configured spray heads to the disposal area without overloading the existing 3,000 gallon per day aerobic treatment units.

Re: The Religious Land Use and Institutionalized Persons Act

Dear State, County, and Municipal Officials:

I am writing to you today to highlight the obligation of public officials to comply with the various provisions of the Religious Land Use and Institutionalized Persons Act (RLUIPA), and to inform you about documents previously issued by the Department of Justice (Department) that may be of assistance to you in understanding and applying this important Federal civil rights law.

The freedom to practice religion according to the dictates of one's conscience is among our most fundamental rights, written into our Constitution and protected by our laws. In our increasingly diverse nation, the Department continues to steadfastly defend this basic freedom and ensure that all people may live according to their beliefs, free of discrimination, harassment, or persecution.

Over the years Congress has passed a number of laws that protect the religious liberties of those who live in America, including the landmark Civil Rights Act of 1964 and the 1996 Church Arson Prevention Act. In 2000 Congress, by unanimous consent, and with the support of a broad range of civil rights and religious organizations, enacted the Religious Land Use and Institutionalized Persons Act. 42 U.S.C. § 2000cc et seq. In enacting RLUIPA, Congress determined that there was a need for Federal legislation to protect religious individuals and institutions from unduly burdensome, unreasonable or discriminatory zoning, landmarking, and other land use regulations.¹ Congress heard testimony that houses of worship, particularly those of minority religions and start-up churches, were disproportionately affected, and in fact often were actively discriminated against, by local land use decisions. Congress also found that, as a whole, religious institutions were treated worse than secular places of assembly like community centers, fraternal organizations, and movie theaters, and that zoning authorities frequently violated the United States Constitution by placing excessive burdens on the ability of congregations to exercise their faiths.

¹ RLUIPA also contains provisions that prohibit regulations that impose a "substantial burden" on the religious exercise of persons residing or confined in an "institution," unless the government can show that the regulation serves a "compelling government interest" and is the least restrictive way for the government to further that interest. 42 U.S.C § 2000cc-1.

RLUIPA includes a private right of action, which allows private individuals to enforce its provisions. Congress also gave the U.S. Attorney General the authority to enforce RLUIPA, and the Department of Justice has been active in enforcing this important civil rights law since its enactment. To date, the Department has opened nearly 100 formal investigations and filed nearly 20 lawsuits related to RLUIPA's land use provisions.² Through these efforts, as well as those by private parties, RLUIPA has helped secure the ability of thousands of individuals and institutions to practice their faiths freely and without discrimination.

Yet, sixteen years after RLUIPA's enactment, far too many people and communities remain unaware of the law, or do not fully understand the scope of its provisions. Earlier this year, the Department's Civil Rights Division launched *Combating Religious Discrimination Today*, an initiative bringing together community leaders around the country to discuss challenges regarding religious discrimination, religion-based hate crimes, and religious freedom, and to discuss possible solutions. One of the issues raised repeatedly from participants was that municipal, county, and other state and local officials are insufficiently familiar with the land use provisions of RLUIPA and their obligations under this Federal civil rights law. Participants also reported that houses of worship, particularly those from less familiar religious traditions, often face unlawful barriers in the zoning and building process. Additionally, participants explained that, in their experience, litigation frequently was avoided when the communities informed local officials of their obligations under RLUIPA early in the process. Participants recommended that the Department take proactive measures to ensure that state and local officials are properly educated about RLUIPA's land use provisions.³

In light of this, we are sending this letter to you and other officials throughout the country to remind you about the key provisions of RLUIPA. Ensuring that our constitutional protections of religious freedom are protected requires that Federal, state, and local officials work together, and to that end, we encourage you to share this letter with your colleagues. We hope that you will continue to work with the Department of Justice going forward and view us as a partner and ally in ensuring that no individuals in this country suffer discrimination or unlawful treatment simply because of their faiths.

² This work is detailed in reports on enforcement issued in September 2010 (available at https://www.justice.gov/crt/rluipa_report_092210.pdf) and July 2016 (available at <https://www.justice.gov/crt/file/877931/download>).

³ The *Combating Religious Discrimination Today* report is available at https://www.justice.gov/Combating_Religious_Discrimination.

1. RLUIPA provides broad protections for religious individuals and institutions.

RLUIPA's land use provisions provide a number of protections for places of worship, faith-based social service providers and religious schools, and individuals using land for religious purposes. Specifically, RLUIPA provides for:

- *Protection against substantial burdens on religious exercise:* Section 2(a) of RLUIPA prohibits the implementation of any land use regulation that imposes a "substantial burden" on the religious exercise of a person or institution except where justified by a "compelling government interest" that the government pursues using the least restrictive means.⁴
- *Protection against unequal treatment for religious assemblies and institutions:* Section 2(b)(1) of RLUIPA provides that religious assemblies and institutions must be treated at least as well as nonreligious assemblies and institutions.
- *Protection against religious or denominational discrimination:* Section 2(b)(2) of RLUIPA prohibits discrimination "against any assembly or institution on the basis of religion or religious denomination."
- *Protection against total exclusion of religious assemblies:* Section 2(b)(3)(A) of RLUIPA provides that government must not totally exclude religious assemblies from a jurisdiction.
- *Protection against unreasonable limitation of religious assemblies:* Section 2(b)(3)(B) of RLUIPA provides that government must not unreasonably limit "religious assemblies, institutions, or structures within a jurisdiction."

While the majority of RLUIPA cases involve places of worship such as churches, synagogues, mosques, and temples, the law is written broadly to cover a wide range of religious uses. The "substantial burden" provision in Section 2(a) of the statute applies to burdens on "a person, including a religious assembly or institution." The remaining provisions apply to any religious "assembly or institution." Thus, RLUIPA applies widely not only to diverse places of worship, but also to religious schools, religious camps, religious retreat centers, and religious social service facilities such as group homes, homeless shelters, and soup kitchens, as well as to individuals exercising their religion through use of property, such as home prayer gatherings or Bible studies.

To be clear, RLUIPA does not provide a blanket exemption from local zoning or landmarking laws. Rather, it contains a number of safeguards to prevent discriminatory, unreasonable, or unjustifiably burdensome regulations from hindering religious exercise. Ordinarily, before seeking recourse from RLUIPA, those seeking approval for a religious land

⁴ Section 2 of RLUIPA is codified at 42 U.S.C § 2000cc.

use will have to apply for permits or zoning relief according to the regular procedures set forth in the applicable ordinances, unless doing so would be futile, or the regular procedures are discriminatory or create an unjustifiable burden. While zoning is primarily a local matter, where it conflicts with Federal civil rights laws such as the Fair Housing Act or RLUIPA, Federal law takes precedence.

Each of the aforementioned protections in RLUIPA are discussed in greater detail below.⁵

2. RLUIPA protects against unjustified burdens on religious exercise.

Land use regulations frequently can impede the ability of religious institutions to carry out their mission of serving the religious needs of their members. Section 2(a) of RLUIPA bars imposition of land use regulations that create a “substantial burden” on the religious exercise of a person or institution, unless the government can show that it has a “compelling interest” for imposing the regulation and that the regulation is the least restrictive way for the government to further that interest. A mere inconvenience to the person or religious institution is not sufficient, but a burden that is substantial may violate RLUIPA. For example, in a case in which the United States filed a friend-of-the-court brief in support of a Maryland church’s challenge to a rezoning denial, a Federal appeals court ruled that the church had “presented considerable evidence that its current facilities inadequately serve its needs,” and that the “delay, uncertainty and expense” in looking for a different property may create a substantial burden on the church’s religious exercise in violation of RLUIPA.⁶ The court relied on facts including that the church had to hold multiple services, turn away worshipers, and curtail a number of important activities at its current location, and that it had a reasonable expectation that it could develop its new property. Similarly, the Department of Justice filed suit in a California Federal district court alleging that a city’s denial of zoning approval for a mosque to take down the aging and inadequate structures in which it had been worshipping and construct a new facility imposed a substantial burden on the congregation.⁷ The mosque, which was grandfathered for its current use, consisted of a group of repurposed buildings for its various activities and a large tent for overflow from the prayer hall. However, the city prohibited the mosque from replacing the buildings and tent with a single building. The case was resolved by a consent decree in Federal court.

If imposition of a zoning or landmarking law creates a substantial burden on religious exercise, such imposition is invalid unless it is supported by a compelling governmental interest pursued through the least restrictive means. RLUIPA does not define “compelling interest,” but

⁵ Further information may be found in the *Statement of the Department of Justice on Land Use Provisions of the Religious Land Use and Institutionalized Persons Act* (available at https://www.justice.gov/crt/rluipa_q_a_9-22-10.pdf), and at the Department of Justice Civil Rights Division RLUIPA information page (<https://www.justice.gov/crt/religious-land-use-and-institutionalized-persons-act>).

⁶ *Bethel World Outreach v. Montgomery Cnty. Council*, 706 F.3d 548, 557-558 (4th Cir. 2013).

⁷ *United States v. Lomita*, No. 2:13-CV-00707 (E.D. Cal. filed March 3, 2013).

the U.S. Supreme Court has previously explained that compelling interests are “interests of the highest order.”⁸

3. RLUIPA protects equal access for religious institutions and assemblies.

Section 2(b)(1) of RLUIPA – known as the “equal terms” provision – mandates that religious assemblies and institutions be treated at least as well as nonreligious assemblies and institutions. For example, a Federal appeals court ruled that zoning restrictions that a city applied to places of worship but not to lodges, union halls, nightclubs, and other assemblies, violated the equal terms provision.⁹ This included a requirement that places of worship, but not other assembly uses, obtain the permission of 60% of neighbors in a 1,300-foot radius. The Department of Justice filed a friend-of-the-court brief arguing that the distinction violated RLUIPA. Similarly, the Department brought suit under RLUIPA’s equal terms provision against a town in Illinois that permitted clubs, lodges, meeting halls, and theaters in its business districts, but excluded places of worship.¹⁰ The case was prompted after the town served notice of violation on four small churches operating in locations where these nonreligious assembly uses were permitted. The case was resolved by consent decree.

4. RLUIPA protects against religious discrimination in land use.

Section 2(b)(2) of RLUIPA bars discrimination “against any assembly or institution on the basis of religion or religious denomination.” Thus if an applicant is treated differently in a zoning or landmarking process because of the religion represented (e.g., Christian, Jewish, Muslim), or because of the particular denomination or sect to which the applicant belongs (e.g., Catholic, Orthodox Jewish, or Shia Muslim), then RLUIPA will be violated. The Department of Justice filed suit alleging that a mosque in Georgia was discriminated against in violation of Section 2(b)(2), based on statements by city officials indicating bias, evidence that the city sought to appease citizens who had expressed bias, and evidence that the city had previously approved numerous similarly sized and located places of worship of other faiths.¹¹ The case was resolved by consent decree. Similarly, the Department filed suit in order to challenge a zoning change enacted by a New York municipality that prevented the construction of a Hasidic Jewish boarding school.¹² The case was resolved by consent decree.

⁸ *Church of the Lukumi Babalu Aye, Inc. v. City of Hialeah*, 508 U.S. 520, 546 (1993).

⁹ *Opulent Life Church v. City of Holly Springs*, 697 F.3d 279 (5th Cir. 2012).

¹⁰ *United States v. Waukegan*, No. 08-C-1013 (N.D. Ill. filed February 19, 2008).

¹¹ *United States v. City of Lilburn* 1:11-CV-2871 (N.D. Ga. filed August 29, 2011).

¹² *United States v. Village of Airmont*, 05 Civ. 5520 (S.D.N.Y. filed June 10, 2005).

5. RLUIPA protects against the total or unreasonable exclusion of religious assemblies from a jurisdiction.

Under section 2(b)(3) of RLUIPA, a zoning code may not completely, or unreasonably, limit religious assemblies in a jurisdiction. Thus, if there is no place where houses of worship are permitted to locate, or the zoning regulations looked at as a whole deprive religious institutions of reasonable opportunities to build or locate in the jurisdiction, this provision will be violated. For example, a Federal district court in Florida granted summary judgment to a synagogue on its unreasonable limitations claim, holding that RLUIPA was violated where “there was limited availability of property for the location of religious assemblies, religious assemblies were subject to inflated costs in order to locate in the City, and religious assemblies were subject to more stringent requirements than other similar uses.”¹³

* * * *

The Department of Justice is committed to carrying out Congress’s mandate and ensuring that religious assemblies and institutions do not suffer from discriminatory or unduly burdensome land use regulations. We look forward to working collaboratively with you and all other stakeholders on these important issues. Should you have questions about the contents of this letter, or other issues related to RLUIPA, I encourage you to contact Eric Treene, Special Counsel for Religious Discrimination, at 202.514.2228 or Eric.Treene@USDOJ.gov.

Sincerely,

Vanita Gupta
Principal Deputy Assistant Attorney General
Civil Rights Division

Planning and Zoning Special Meeting

Item #1

DATE: July 13, 2020

FROM: Sylvia Ordeman, Town Administrator

ITEM: Consider recommendations to the Town Council regarding a Site Plan for First Church Nazarene/Lantana Community Church/Harvest Christian Academy being all of a tract of land being described as Kincade Lot 2R, Block A, Town of Bartonville, Denton County, Texas. The property is generally described as a 10.09-acre tract of land located on the north side of East Jeter Road, more commonly known as 2200 E. Jeter Road, Bartonville, Texas. ***(The Planning and Zoning Commission, after closing the public hearing, moved on July 1, 2020, to postpone consideration and action on their recommendation until a special meeting on July 13, 2020.)***

Summary:

The Planning and Zoning Commission moved on July 1, 2020, to postpone their recommendation until a special meeting on July 13, 2020. The postponement was to allow the applicant additional time to address two main outstanding issues:

- Septic system: The OSSF designer, Jay Pinkston, has provided an update and the Town's Sanitarian concurs with the designer's assessment. The required alterations will need to be permitted.
- Fire code/sprinkler system: Chief Lugo has provided clarification to the occupancy and updated the requirements in the attached memo.

ATTACHMENTS:

- Septic Contractor Letter dated July 6, 2020
- Fire Code Requirements from Assistant Chief Lugo

July 6, 2020

To: Town of Bartonville Env. Health / OSSF review
Re: Lantana Community Church, 2200 E. Jeter Rd., Bartonville, Tx.

The Church has asked me to review design of the current ossf serving their facility to determine if it is properly sized to handle domestic waste from a proposed 100 student school (maximum). There will be no food preparation and the school is expected to operate 5 days per week. Using the 100 students x 12 gpd each, it is anticipated that an addition maximum of 1200 gallons might be added to the system.

Current worship services are 2 x week with 150 in attendance on Sunday and 50 on Wednesday night. Using 4 gal/person that is 600 gallons on Sunday and 200 on Wednesday night.

Current ossf has the treatment capacity of 3000 gpd according to original installation design and drawing. I am attaching water usages for the last year, however irrigation water is included in the totals and what is actually treated by the ossf is unknown.

The original system inspection shows the spray heads broadensing a 40 ft. radius. This is not realistic even with new pump pressure. At new pump and head specs, the heads will do a 30' radius throw. Based in above calculations, the spray/disposal field will need to be a minim of 28,125 sq. ft. or 10 heads. I recommend 12 heads or 3 zones of 4 heads per zone. This will insure adequate disposal as well as allow for some increase in water consumption as long as it does not exceed 3000 GPD.

Depending on how water lines enter the existing building and how water is run to school area, it is recommended that the church, school, and irrigation water be individually metered so that water usage can be accurately verified.

Permit conditions will require periodic BOD, TSS, and pH testing and monitoring of treated waste to insure that surface discharged water meets minimum standards.

If for any reason the system fail or water usage exceed design treatment capacity, it will be the responsibility of the owner to bring the ossf into compliance immediately.

Please let me know if you have questions.

Fire Code Requirements

July 6, 2020

TO: Tammy Dixon - Town Secretary, Bartonville, Texas
FROM: Michael Lugo, Assistant Fire Chief *ML*
SUBJECT: 2200 E Jeter Rd

Hi Tammy,

Below you will find updated information that was requested from the P&Z meeting for 2200 E Jeter rd., Bartonville, Texas. The facility is looking to operate with two different occupancy type classifications. The primary existing occupancy is listed as an Assembly occupancy for the church. The new applicant is wanting to open an educational type occupancy to the building.

The new applicant is seeking to occupy the same building for grades K-12 with a max occupancy of 150 students per our last meeting. With the increase in occupants with the new applicant, there is an increased life safety risk due to the occupant type and load of a non-sprinkled building. After further research, the occupant load from the church does affect the new applicant's total occupants for their CO. What this means is if the church has 8 administrative staff working in the same building it counts towards the school's max occupancy numbers. If the school exceeds more than 100 occupants that includes church staff, the building shall be sprinkled.

There is also a concern that if the school stays below the 100 max occupant load to have an occupancy type classification as A-3 and they wish to have plays, invite family to the school or events for the school on-site that they will exceed the 100 max occupant load for their certificate of occupancy. If a CO is approved for the new occupant and it is listed as an A-3 occupancy, anytime the occupancy exceeds 100 occupants the CO shall be revoked until a fire sprinkler system is installed.

The maximum time allowed to bring the building up to code that includes a fire sprinkler system is 12 months. The entire building will need to be sprinkled not just the educational side of the structure.

Below are areas for the 2012 IFC that the town has adopted.

PO Box 984 • 511 S Gibbons Rd • Argyle, TX 76226 • 940-464-7102 • (Fax) 940-464-3612

102.3 Change of use or occupancy.

No change shall be made in the use or occupancy of any structure that would place the structure in a different division of the same group or occupancy or a different group of occupancies, unless such structure is made to comply with the requirements of this code and the *International Building Code*. Subject to the approval of the *fire code official*, the use or occupancy of an existing structure shall be allowed to be changed and the structure is allowed to be occupied for purposes in other groups without conforming to all the requirements of this code and the *International Building Code* for those groups, provided the new or proposed use is less hazardous, based on the life and fire risk than the existing use.

105.1.3 Permits for the same location.

When more than one permit is required for the same location, the *fire code official* is authorized to consolidate such permits into a single permit provided that each provision is listed in the permit.

Chapter 2 Definitions

[B] Educational Group E.

Educational Group E occupancy includes, among others, the use of a building or structure, or a portion thereof, by six or more *persons* at any one time for educational purposes through the 12th grade. Religious educational rooms and religious auditoriums, which are accessory to places of religious worship in accordance with Section 508.3.1 of the *International Building Code* and have *occupant loads* of less than 100, shall be classified as Group A-3 occupancies.

A-3 Assembly uses intended for worship, recreation or amusement and other assembly uses not classified elsewhere in Group A, including, but not limited to:

- Amusement arcades
- Art galleries
- Bowling alleys
- Community halls
- Courtrooms
- Dance halls (not including food or drink consumption)
- Exhibition halls
- Funeral parlors
- Gymnasiums (without spectator seating)
- Indoor swimming pools (without spectator seating)
- Indoor tennis courts (without spectator seating)
- Lecture halls

KEY BOXES

506.1 Where required. All buildings, built, moved into or where a new certificate of occupancy is required, must purchase and install a "Knox Box"™ key vault and install in a location approved by the fire code official. All required keys necessary to obtain access into the building and secured areas inside, access cards, or codes must be placed inside the Knox Box™ before a Certificate of Occupancy being issued. Office buildings and other common use areas of multi-family facilities will be required to be equipped with a Knox Box™.

Fire Sprinkler requirements

903.2.1.3 Group A-3. An automatic sprinkler system shall be provided for Group A-3 occupancies where one of the following conditions exists:

1. The fire area meets or exceeds 5,000 square feet
2. The fire area has an occupant load of 300 or more; or
3. The fire area is located on a floor other than a level of exit discharge serving such occupancies;

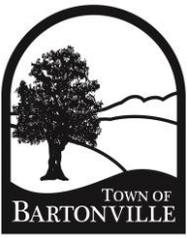

903.2.2 Group E. An automatic sprinkler system shall be provided for Group E occupancies as follows:

1. Throughout all Group E fire areas that meets or exceeds 5,000 square feet (464.5 m²)
2. Throughout every portion of educational buildings below the level of exit discharge.

903.2.2 Exception Deleted.

Section 907.2.3; change to read as follows

907.2.3 Group E. A manual and automatic fire alarm system that activates the occupant notification system in accordance with new Section 907.6 shall be installed in Group E educational occupancies. When automatic sprinkler systems or smoke detectors are installed, such systems or detectors shall be connected to the building fire alarm system. An approved smoke detection system shall be installed in Group E day care occupancies. Unless separated by a minimum of 100' open space, all buildings, whether portable buildings or the main building, will be considered one building for alarm occupant load consideration and interconnection of alarm systems.

Planning and Zoning Commission Meeting

Item #5

DATE: July 1, 2020

FROM: Sylvia Ordeman, Town Administrator

ITEM: Public hearing to hear public comment and consider recommendations to the Town Council regarding a Site Plan for First Church Nazarene/Lantana Community Church/Harvest Christian Academy being all of a tract of land being described as Kincade Lot 2R, Block A, Town of Bartonville, Denton County, Texas. The property is generally described as a 10.09-acre tract of land located on the north side of East Jeter Road, more commonly known as 2200 E. Jeter Road, Bartonville, Texas.

RE: Site Plan Application

Lantana Community Church / Harvest Christian Academy / First Church of the Nazarene (Kincade Addition, Lot 2R)

Owner: First Church of the Nazarene

Developer: Lantana Community Church / Harvest Christian Academy

PROPERTY INFORMATION

The approximately 10-acre lot is located at 220 Jeter Road E, Bartonville, TX and is currently used as a church, known as Lantana Community Church. The property is zoned AG, Agricultural. Both the use as a church and the proposed K5-12 grade school* are permitted uses in accordance with Appendix C of Chapter 14, Zoning, of the Bartonville Code of Ordinances. (* Pending approval by Town Council of an update to Chapter 2, Definitions of the Zoning Ordinance. Definition of Private and Public Schools)

The applicant has submitted site plan information three times to respond to minimum site plan requirements and comments from the consulting planner and town staff. A Development Review Committee (DRC) meeting was held at the Town Hall at 1:00 PM, Wednesday, June 24, 2020. The applicant presented information about the addition of a Christian school use to the existing church facilities. Representatives from the town staff, consulting planner, consulting engineer, town sanitarian, fire department, Planning & Zoning Commission and Town Council attended the DRC in person or via Zoom to discuss the site plan and the proposed school use on the church property.

The DRC discussion focused on three main outstanding issues:

- 1. Traffic circulation**
- 2. Sanitary sewer/septic system**
- 3. Fire code/sprinkler system**

All three issues related back to the number of students, teachers and staff which would be occupying the building daily during the week, versus the church assembly use which is primarily on Sunday. The applicant stated that 70 students are pre-enrolled for the fall (tentatively starting in August, with a goal of having 100 students. A future maximum capacity of 150 students was also discussed. The number of teachers and staff on-site during school days was not stated.

Traffic Circulation

The traffic circulation diagram submitted by the applicant indicates a simple “U” circulation with the Jeter (west) driveway being the designated entry and the Wolf Run Road (east) driveway being the designated exit from the parking area. Additional information requested by the DRC:

1. Estimated number of daily vehicles during AM drop-off (8:00-8:30)
2. Number of stacking spaces for vehicles dropping off within the property
3. Additional/alternate drop-off stacking area, if needed
4. Logistics for a “double loaded” drop-off option
5. Consideration of limiting the site entry to only eastbound traffic on Jeter Road. This would require parents to from the east on FM 407 to continue north to the signal light at McMakin Road, travel south to Jeter and then have a right turn into the church parking lot. This “make the block” traffic pattern would reduce turning movements into the parking lot and eliminate possible concerns about stacking on Jeter Road to the east towards FM 407.

Sanitary Sewer/Septic System

Leslie Freeman, the Bartonville sanitarian, has reviewed the original commercial septic system permit issued for the church and raised concerns. The original permit was based on 40’ radius sprinkler head coverage for the effluent and current approved heads only provide 36’ radius coverage. With the addition of the school and the students, additional sprinkler heads will need to be added to the system. This new design must be prepared by a qualified engineer, reviewed and approved by the Town. Key to the septic system design will be a projected timeline for the church and school occupancy during the entire week. The required septic system will need to be calculated on the maximum number of students, teachers, clergy and staff. These calculations will also be impacted on whether hot lunches are prepared on site daily. The enlargement of the septic system will need to be designed and permitted for the new school use.

Fire Code/Sprinkler System

The addition of the school use to the existing church facility requires a new Certificate of Occupancy (CO). Since the building is over 5,000 square feet the current Fire Code will require an automated fire suppression system (sprinkler system) for the building. At the DRC there was discussion about the total number of students, teachers and staff for the school type of occupancy, and the timing of the sprinkler system permitting and improvements.

If you have any questions, please contact me at bhudson@dunawayassociates.com or call me on my cell phone at 817-995-9703.

Submitted for your consideration,

SPECIFIC DRAWING NOTES

- CITY OF BARTONVILLE, TEXAS - AUTHORITY HAVING JURISDICTION
- ONLY 1ST FLOOR WILL BE USED FOR DAY CARE SERVICES.
- BUILDING IS NOT SPRINKLED.

SEQUENCE OF OPERATIONS

- ACTIVATION OF ANY AUTOMATIC DETECTOR OR PULL STATION SHALL INDICATE AT CONTROL PANEL ORIGIN OF ALARM VIA AN L.C.D. DISPLAY.
- ACTIVATE AN AUDIBLE SIGNAL AT THE FIRE ALARM CONTROL PANEL.
- ACTIVATE BUILDING AUDIBLE DEVICES.
- ACTIVATE VISUAL DEVICES.
- REPORT A DISTINCT WATERFLOW SIGNAL TO U.L. LISTED CENTRAL STATION.
- CLOSURE OF ANY SUPERVISED SPRINKLER SYSTEM SHUTOFF VALVE OR LOW AIR PRESSURE SUPERVISORY SHALL:
- INDICATE AT CONTROL PANEL ORIGIN OF ALARM VIA AN L.C.D. DISPLAY.
- ACTIVATE AN AUDIBLE SIGNAL AT THE FIRE ALARM CONTROL PANEL THAT SEPARATE AND DISTINCT FROM ALARM AND TROUBLE AUDIBLE SIGNAL SHALL BE SILENCIBLE BUT SHALL OPERATE IN A MANNER SIMILAR TO THAT DESCRIBED FOR TROUBLE SIGNAL SILENCING.
- REPORT SUPERVISORY CONDITION TO U.L. LISTED CENTRAL STATION.
- OCCURRENCE OF A FAULT IN WIRING ON ANY SUPERVISED CIRCUIT WITHIN THE SYSTEM SHALL:
- INDICATE AT CONTROL PANEL VIA AN L.C.D. DISPLAY.
- SOUND AN AUDIBLE SIGNAL AT FIRE ALARM CONTROL PANEL. SIGNAL SHALL BE SILENCIBLE BY MEANS OF A PUSH BUTTON HOWEVER, A SUPERVISORY L.E.D. SHALL CONTINUE TO IDENTIFY PRESENCE OF A TROUBLE CONDITION UNTIL IT IS CLEARED. UPON CLEARING OF ALL TROUBLE WITHIN THE SYSTEM, TROUBLE SIGNAL SHALL RESOUND NORMAL POSITION.
- ACTIVATION OF ANY DUCT DETECTOR SHALL:
- SHUT DOWN THE ASSOCIATED AIR HANDLER UNIT VIA RELAY IN THE DUCT DETECTOR.
- SOUND A SUPERVISORY SIGNAL AT FIRE ALARM CONTROL PANEL. SIGNAL SHALL BE SILENCIBLE BY MEANS OF A PUSH BUTTON HOWEVER, A SUPERVISORY L.E.D. SHALL CONTINUE TO IDENTIFY PRESENCE OF A SUPERVISORY CONDITION UNTIL IT IS RESET.
- REPORT SUPERVISORY CONDITION TO U.L. LISTED CENTRAL STATION.

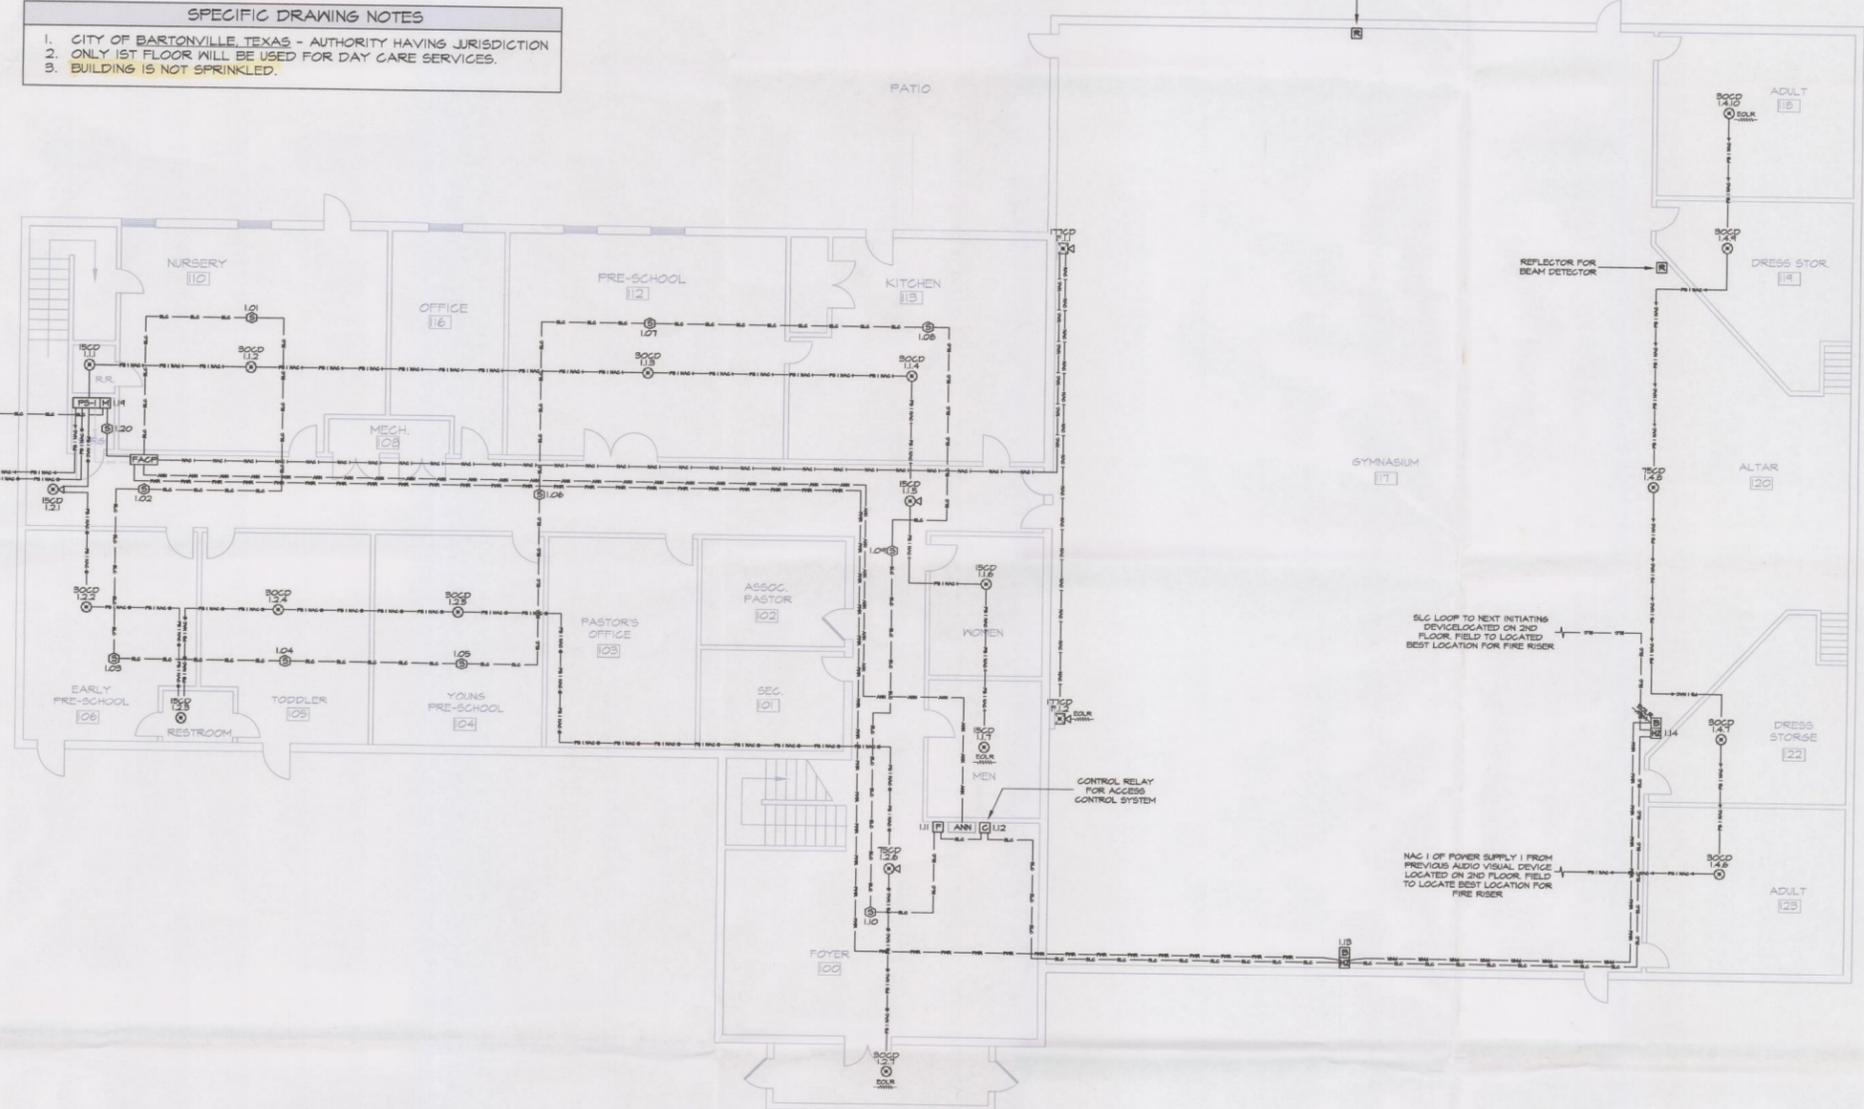

GENERAL NOTES

- A SMOKE DETECTOR SHALL BE PROVIDED ABOVE ALL FIRE ALARM CONTROL UNITS.
- ALL HORN STROBES AND STROBES SHALL BE SYNCHRONIZED.
- ALL HORNS SHALL SOUND SHULDS TEMPORAL PER CODE.
- INSTALLATION SHALL CONFORM TO ALL REQUIREMENTS OF APPLICABLE ELECTRICAL CODES.
- WIRING METHODS AND MATERIALS SHALL CONFORM WITH ALL APPLICABLE SECTION OF NEC 760.
- 120 VAC @ 60HZ INPUT POWER SHALL BE INSTALLED BY LICENSE ELECTRICAL CONTRACTOR.
- ALL SLEEVES AND PENETRATION AND FIRE CALKING SHALL BE PROVIDED BY ELECTRICAL CONTRACTOR.
- DEDICATED LOCKING BREAKER PROPERLY LABELED SOURCE SHALL SUPPLY FIRE ALARM CONTROL(S) PANEL.
- 120 VAC IS NOT PERMITTED IN THE SAME RACEWAY AS LOW VOLTAGE WIRING.
- HORN STROBES AND STROBES SHALL BE MOUNTED AT 10' A.F.F. UNLESS NOTED OTHERWISE.
- ANY SMOKE DETECTOR HEAD INSTALLED BEFORE BUILDING IS CLEANED AND ACCEPTED SHALL BE COVERED TO PROTECT FROM DUST AND ANY FALSE ALARMS DUE TO DIRT-CONTAMINATED HEAD SHALL BE THE RESPONSIBILITY OF THE GENERAL AND/OR THE ELECTRICAL CONTRACTOR.
- THERE SHALL BE NO RACEWAYS ENTERING THE LOWER 18" OF FIRE ALARM PANEL PRIOR PRE-TESTING.
- MANUAL PULL STATION SHALL BE MOUNTED AT 48" ABOVE FINISHED FLOOR.
- THE OWNER SHALL FURNISH TWO (2) WORKING TELEPHONE NUMBER AT FIRE ALARM PANEL PRIOR PRE-TESTING.
- LOCAL FIRE MARSHALL SHALL WITNESS FINAL TEST.
- 24 HOUR CENTRAL MONITORING WILL BE PROVIDED AND SETUP BY OWNER PRIOR PRE-TEST OF SYSTEM.
- ALL INITIATING DEVICE CIRCUIT SHALL BE CLASS "A" WIRING WITH A MINIMUM OF SIX (6) FOOT SEPARATION.
- MINIMUM OF 0.575 LUMENS/SQ.FT. AT ANY POINT WITHIN THE COVERAGE AREA (E=1/02) (2010 EDITION OF NFPA 72 PER SECTION 15.4.5.1)
- FIRE ALARM SYSTEM IS DESIGNED ON THE GUIDE LINES OF THE 2004 EDITION OF INTERNATIONAL FIRE CODE AND THE 2010 EDITION OF NFPA 72.

OWNER'S CERTIFICATE AND DEDICATION

STATE OF TEXAS : WHEREAS WE, Lantana Community Fellowship, are the owners of all that certain ML tract or parcel of land situated in the B. B. & C. Railroad Company Survey, Abstract Number 152, Town of Bartonville, Denton County, Texas, being all of Lots 2 and 3, Kincaid Subdivision, as shown on the plat thereof recorded in Cabinet C, Page 129 of the Plat Records of Denton County, Texas, and being described by metes and bounds as follows:

BEGINNING at a 3" rebar found at the southwest corner of Lot 2, Kincaid Subdivision, being the southwest corner of Lot 1 of same and being on the north line of that certain tract of land described in deed to Linda Wacker recorded in Oak's File Number 04-71774 of the Real Property Records of Denton County, Texas;

THENCE N 00°12'27" E, along the east line of Lot 1 and the west line of Lot 2, passing at 597.33 feet, a 3" rebar found and continuing a total distance of 597.83 feet, to the northeast corner of Lot 2 and the northeast corner of Lot 1, being on the south right-of-way line of F. M. Highway 407 (90' R.O.W.) and being in a curve to the right;

THENCE Northeastly, along the north line of Lot 2, the south right-of-way line of F. M. Highway 407 and with the arc of said curve having a radius of 2918.79 feet, a central angle of 03°5'20", whose chord bears N 86°2'36" E, 288.05 feet, on an arc length of 288.19 feet, to a wood right-of-way monument found;

THENCE N 89°36'00" E (Record), continuing along the south right-of-way line of F. M. Highway 407, and the north line of Lot 2, passing the northeast corner thereof and the northeast corner of Lot 3 and continuing a total distance of 426.63 feet, to the northeast corner of Lot 2, being the northeast corner of Lot 1, Wolf Hill Estates, on addition to the Town of Bartonville according to the plat thereof recorded in Cabinet C, Page 202 of the Plat Records of Denton County, Texas;

THENCE S 00°13'04" W, along the west line of Lot 3, Kincaid Addition and the west line of Lot 1, Wolf Hill Estates, passing at 542 feet, a 3" rebar and passing the southwest corner of Lot 1, Wolf Hill Estates, being the northerly northeast corner of Lot 2 of same and continuing a total distance of 611.24 feet, to a 3" rebar found at the northeast corner of Lot 2, Kincaid Subdivision;

THENCE S 89°36'40" W, 186.62 feet, along the south line of Lot 3, Kincaid Subdivision and the westerly north line of Lot 2, Wolf Hill Estates, to a 3/8" rebar found at the westerly northeast corner thereof, being the northeast corner of said Wacker tract;

THENCE S 89°36'11" W, continuing along the north line of said Wacker tract and the south line of Lot 3, Kincaid Subdivision, passing the southwest corner thereof and the southeast corner of Lot 2 and continuing a total distance of 527.37 feet, to the POINT OF BEGINNING and containing approximately 10.009 acres of land.

NOW, THEREFORE, KNOW ALL MEN BY THESE PRESENTS, THAT WE, Lantana Community Fellowship, acting through our duly authorized representatives, do hereby designate the heretofore described property as Lot 2B, Kincaid Subdivision, on addition to the Town of Bartonville, Texas, and do hereby dedicate, in fee simple, to the public use forever, the streets and easements shown thereon. The streets are dedicated for street purposes. The easements and public use areas, as shown, are dedicated to the public use forever, for the purposes indicated on this plat. No buildings, fences, trees, shrubs or other improvements or growths shall be constructed or placed upon, over or across the easements so shown, except that landscape improvements may be placed in landscape easements, if approved by the Town of Bartonville. In addition, utility easements may also be used for the mutual use and accommodation of all public utilities desiring to use or using the same unless the easement limits the use to particular utilities, said use by public utilities being subordinate to the public's and Town of Bartonville's use thereof. The Town of Bartonville and public utility entities shall have the right to receive and keep removed or parts of any buildings, fences, trees, shrubs or other improvements or growths which may in any way encroach or interfere with the construction, maintenance, or efficiency of their respective systems in said easements. The Town of Bartonville and public utility entities shall at all times have the full right of ingress and egress to and from their respective easements for the purpose of constructing, reconstructing, inspecting, potoling, maintaining, reading meters, and adding to or removing all or parts of their respective systems without the necessity at any time of procuring the permission of anyone.

This plat approved subject to all existing ordinances, rules, regulations and resolutions of the Town of Bartonville, Texas.

WITNESS OUR HAND AND SEAL, this 22 day of December, 2004

Timothy P. Williams
Timothy P. Williams, Senior Pastor
Authorized Representative

"Being a portion of this addition by metes and bounds is a violation of Town Ordinance and State law and is subject to fine and/or abatement of utilities and building permits."

To: Town of Bartonville Env. Health / OSSF review
Re: Lantana Community Church, 2200 E. Jeter Rd., Bartonville, Tx.

The Church has asked me to review design of the current ossf serving their facility to determine if it is properly sized to handle domestic waste from a proposed 100 student school (maximum). There will be no food preparation and the school is expected to operate 5 days per week. Using the 100 students x 12 gpd each, it is anticipated that an addition maximum of 1200 gallons might be added to the system.

Current worship services are 2 x week with 150 in attendance on Sunday and 50 on Wednesday night. Using 2 gal/person that is 300 gallons on Sunday and 100 on Wednesday night.

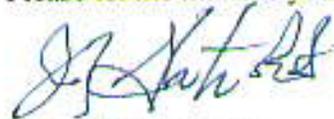

Current ossf has the treatment capacity of 3000 gpd according to original installation design and drawing. I am attaching water usages for the last year, however irrigation water is included in the totals and what is actually treated by the ossf is unknown.

Based on these calculations, it appears that sufficient treatment capacity exists to handle the anticipated load. The existing spray field, if intact from original installation, also has proper sizing to dispose of treated effluent.

Depending on how water lines enter the existing building and how water is run to school area, it is recommended that the church, school, and irrigation water be individually metered so that water usage can be accurately verified.

If for any reason the system fail or water usage exceed design treatment capacity, it will be the responsibility of the owner to bring the ossf into compliance immediately.

Please let me know if you have questions.

RE: Site Plan request for a 10.09-acre tract of land located on the north side of East Jeter Road, more commonly known as 2200 E. Jeter Road in Bartonville, Texas and is identified by the Denton Central Appraisal District as Property ID: 277887.

Dear Property Owner,

In accordance with local zoning laws, all owners of land within two hundred feet of any property being considered for a site plan must be afforded an opportunity to address the subject at a public hearing held for this purpose.

Per the Denton County Appraisal District records, you own property (Property ID ____) within two hundred feet (200') of the property described above. The owner for this property has made an application for a Site Plan for First Church Nazarene/Lantana Community Church/Harvest Christian Academy.

You are hereby notified that the Bartonville Planning and Zoning Commission and Bartonville Town Council will conduct two public hearings regarding a Site Plan for the subject property which may be of interest to you as follows:
