Re: Ramhorn Hill – Dunham 345kV Transmission Line Project

Mr. Adetoro,

I am writing to oppose the Ramhorn Hill – Dunham 345kV Transmission Line Project on behalf of the Town of Bartonville. The Town cannot support any infrastructure project that disrupts the country lifestyle our residents expect, to fuel the growth of other communities that have made different choices for their future. It appears that the Town could support the southern route proposed by Northlake and Argyle, but we would need more details to make that determination.

Staff has spent the last two days working feverishly to understand this project and its impacts, as the Town was not notified in advance that this project runs through its jurisdiction. At least one directly impacted resident on Glenview Drive has also stated that they were not notified of this project or of the public input process.

I request an update with myself and the Town Administrator at your earliest convenience.

Sincerely,

Jaclyn Carrington, Mayor
